                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             300
                                                                                                                                                                                                                                                                                          The invention relates to human PRO polypeptides and the polynucleotides encoding them. The sequences are useful in the preparation of a medicament for treating a condition responsive to a PRO polypeptide. The polypeptides are useful in a number of functional biological assays, as molecular weight markers for protein electrophoresis and as therapeutic
                                                                                                                                                                                                                                                                                                                                                                                                                                     9
                                                                                                                                                                                                                                                                                                                                                                                                                                                               60

The invention relates to an isolated PRO polypeptide (secreted or transmembrane protein) having at least 80% amino acid sequence identity to an amino acid sequence chosen from 123 fully defined sequences as given in the specification (including their extracellular domains either or without their associated signal peptides. Also include are the nucleotide (NA) sequences encoding PRO, a vector comprising the PRO NA, a

host cell comprising the vector, producing PRO, a chimaeric molecule comprising PRO fused to a heterologous amino acid sequence, and an anti-PRO antibody. Pro is useful as molecular weight markers for protein clectrophoresis and also for chromosome identification. PRO is also useful for tissue typing. PRO and PRO MA are useful as hybridisation probes for a cDNA library to isolate the full-length PRO cDNA. PRO NA is useful in development and screening useful reagents. PRO NA is also useful in gene therapy. PRO1244, PRO1286 and PRO1303 polypeptides are useful for treating cancerous tumours. PRO1250, PRO1418 and PRO1416 polypeptides are useful for treating cardiac insulficiency disorders. PRO1266 polypeptide are useful for treating cardiac insulficiency disorders. PRO1266 polypeptide are useful for treating calcium flux in human umbilical vein endothelial cells. PRO1265, PRO1250 and PRO146 polypeptides are useful for treating calcium flux in human umbilical vein endothelial cells. PRO1265, PRO1250 and PRO1418 to 1ypeptides are useful for treating diabetes in skeletal muscle cells and obesity. PRO1265, PRO1244 and PRO1382 polypeptides are useful for treating diabetes in skeletal muscle cells and obesity. PRO1265, PRO1264 and PRO1382 polypeptides are useful for treating diabetes are useful for treating diabetes in skeletal muscle cells and obesity. PRO1265, PRO1264 and PRO1382 polypeptides are useful for treating diabetes in skeletal muscle cells and obesity. PRO1265, PRO1244 and PRO1382 polypeptides are useful for treating diabetes in skeletal muscle cells and obesity. PRO1265, PRO1412, PRO1279, PRO1304, PRO1306, PRO1418, PRO1265, PRO1412, PRO1279, PRO1304, PRO1306, PRO1418, PRO1418, PRO1275 are useful in treating that assamias. The present sequence represents a PRO protein of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   120

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       credrececacrearerricareadareda
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 1, Application US/09123386

Patent No. 6344198

GENERAL INFORMATION:

APPLICANT: HE, ET AL.

TITLE OF INVENTION: Human Prostatic Sp

NUMBER OF SEQUENCES: 8

CORRESPONDENCE ADDRESS:

ADDRESSE: HUMAN GENOME SCIENCES, IN

STREET: 9410 KEY WEST AVE

CITY: ROCKVILLE

STATE: MARYLAND

COUNTRY: USA

ZIP: 20850

COMPUTER READABLE FORM:

MEDIUM TYPE: 3.5 INCH DISKETTE

COMPUTER: IBM PS/2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     REFERENCE/DOCKET NUMBER: 91,119
